

Automatic Nozzle Placing Machine Multi-Format for Nozzles without Clip - Mod. AB50

Multi-size automatic machine for placing no-clip nozzles (without ring) in the box, with cartridges already packed.

- **Automatic feeding** of the boxes in **sizes of 6, 8, 12, 15, 16, 20, 24, 25, 30** coming from the cartridge packing machine.
- **Automatic handling** of the boxes up to the nozzle placing station.
- **Automatic feed of the nozzles** through **orienting device with rollers patented by Nannini Renato. Extremely quiet operation.**
- **Hopper for bulk nozzles** with a capacity of about **2,000 nozzles** for **broad autonomy.**
- **Vertical loader** of the nozzles from the hopper to the orienting device.
- **Counting Station of the nozzles** in the right number depending on box size.
- **Stacking station of the nozzles**, one inside the other in a number of **3 or 2 for each row.**
- **Station for the insertion** of the stack of nozzles **between the cartridges in the box.**
- **Station with pressing plate** to push down the row of nozzles possibly not totally dropped between the cartridges.
- **Production speed: up to 50 nozzles/minute**, depending on box size.
- **Ideal to complete** the automatic filling line for holders of the **packing machine mod. INSC.**
